

## Tax Return Deadline January 31st

January 31st is the deadline for Self Assessment tax Returns for UK taxpayers - individuals who fail to file their return before this date will be fined!

If you would like us to complete your tax return please ensure that we receive your information before 20th January so that we have enough time to file the return.

Please contact us if you have any questions about filing a tax return.

If you need to file a company tax return the January deadline does not necessarily apply as the filing period for companies relates to its financial year.

Please email or call if you would like us to complete your company tax return.
